

**FOR EVERY CHALLENGE,
A NEW REWARD.**

It's all about doing your best with what's in your hands,
and hoping for the best with everything that's not.
Through thick and thin... rain and shine, good years and bad.
You do the work. Try to make the right calls. Then see how it all turns out.
It takes a special kind to take on challenges you can't see coming.
It's why we work to make life on the farm a bit more predictable.
So you can have the confidence of being in control and rest a little bit easier.

THAT'S FARMING.

**PLANT THE SEED,
PUT THE RESULTS IN THE BIN.
WHAT HAPPENS IN BETWEEN...**

THAT'S FARMING.

It's true that farming is a never-ending, ever-changing list of factors.
The weather. The markets. Input costs. Supply chain.
Risk and uncertainty—nothing is a given.
But you make informed decisions. Work with great people.
And control what you can, when you can. That's how it works.
We understand we can't eliminate all the variables.
But maybe, more importantly,

WE CAN PROVIDE A LITTLE PEACE OF MIND.

Empowering Growers Through Expertise and Insight

The old saying goes you should "work smarter, not harder." We believe the best results come from doing both. With the Koch Agronomic Services Knowledge Center, you can tap into an ever-growing list of articles and videos to help deepen your understanding of everything from soil nutrition to combining nitrogen loss. Start selecting from the curated selection below.

REDEFINING
THE MYTHS
OF
UAN

Myth Debunked: Incorporating UAN

There are several misconceptions when it comes to UAN, including that it is not nitrogen-efficient due to its volatility, will cause burning if the urea content is too high or that it is not strong enough to protect it from above-ground losses. We're here to bust these myths and help growers make the most of their UAN investment.

The Role of Nitrogen in Crop Production and How to Produce It
The goal is to combine nitrogen with nitrogen to be more as much of it as possible is available for plant uptake, where UAN then is converted to gas throughout the growing season. While we know nitrogen is important to crop yield, we know

Producing Results With Solutions You Can Count On

There are many ways to grow. We know that's why we have a team of agronomists, field managers and agronomists, plant health and soil management solutions, and agronomists and agronomists to help you get the most out of your operation.

We can help you find solutions to see how we can start making a difference in your operation today.

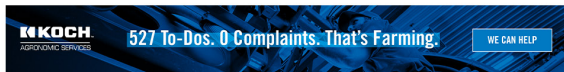

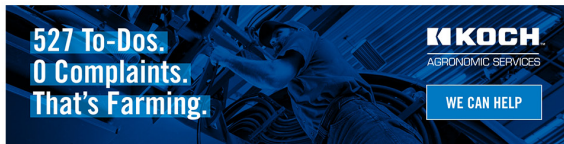

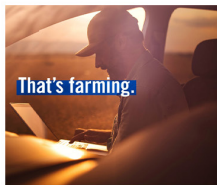

NO-TILL MANAGEMENT
CENTURO
NO-TILL MANAGEMENT
CENTURO
Add extra urea content to the mix with nitrogen-efficient management, nitrogen efficiency and plant growth with CENTURO[®] nitrogen solution. >

NO-TILL MANAGEMENT
ANVOL
NO-TILL MANAGEMENT
ANVOL
Eliminate ammonia volatilization, reduce nitrogen loss and improve your nitrogen management. >

NO-TILL MANAGEMENT
PROTIVATE
NO-TILL MANAGEMENT
PROTIVATE
A full spectrum fertilizer and nutrient, PROTIVATE[™] offers both nitrogen and potassium, along with essential micronutrients. >
